Mr. Hill thought the silver dollar should be remonetized, but would not support the bill now pending before the Senate as it came from the House of Representatives. He believed that if this bill should pass unamended it would enrich a tew individuals and give no relief to the financial embarrassments of the country. It would necessitate additional legislation, and finally take its place in history as the pickpocket bill of American legislation. He objected to free and unlimited coinage and to the proposed unlimited coinage and to the proposed unlimited legal tender power to be given to the silver dollar, and said he could not consent to the coinage of a dollar worth 90 cents and stamping it as a dollar. He believed that the most effective and permanent way to keep the silver dollar equal with the gold dollar was to prescribe for silver a function in our currency.
